

V6C

About the host

Connection Method

V6C is an 2-way communication intercom up to 6 riders to connect at a time, 1 main device can talk with another 5 sub-machines.

Connect main device and A device, long press the for 5s till red & blue lights flash. After both of them find each other, one of them will automatically initiate a pairing connection, and the blue light will flash quickly. After a while, the blue light flashes slow simultaneously, two devices can normal talk.

To pair the next sub-machine, press the pairing button of main device first to disconnect. Connect another four V6C, just repeat the pairing method mentioned above.

The MOTOR/B/C/D/E buttons on the main device are for pairing with the MOTOR/B/C/D/E buttons on five other subdevices. After pairing, press Corresponding pairing buttons of main device to talk with other five subdevices.

Pairing Instructions for the Intercom

★ When the old version of the machine is used as the main machine, it cannot be successfully paired with the new version of the machine.

The new version of the machine must be used as the main machine to successfully pair with the old version of the machine.

Note If the machine cannot be paired, please clear the pairing first, and use the other one as the main machine to pair.
